

CODE REVIEW CHECKLIST

- ☐ Does the code **work** as expected?
- ☐ Is all the code easily **understandable**?
- ☐ Is there any **redundant** or duplicated code?
- ☐ Is there any commented out code? Or **TODOs**?
- ☐ Do the names used in the program convey **intent**?
- ☐ Does the code respect the **SOLID** principles?
- ☐ Are there any obvious **optimizations**?

AUTOMATED TESTS

- ☐ Do automated tests **exist**?
- ☐ Are they comprehensive/**maintainable**?
- ☐ Are they **resistant** to refactoring?
- ☐ **Edge-cases** have been automatically tested?
